

Croydon Best Start PIP

“Building relationships with others so that families with babies and young children can get the services they need when they need them”

What we do

Croydon Best Start PIP is part of the Best Start Integrated Service; we work with parents-to-be and parents of babies up to two years of age (the first 1001 critical days). Our service aims to provide help for families within the local community to build stronger bonds and positive relationships with their babies.

We offer the primary caregiver/s a range of therapeutic and practical interventions and support, delivered by therapists and keyworkers to promote the development of a secure attachment within the parent-infant relationship. This will be parent led and with the option to have one to one or group support.

Some of our interventions are:

- Parent Infant psychotherapy
- Key work support/family/parenting support
- Evidence based group work – Mellow Bumps/ Mums/Dads/Toddlers
- Video Interaction Guidance (VIG)

We work closely with professionals within Croydon who support families with babies; which means that anyone working with families during this period is welcome to either refer to us or discuss any concerns about the parent-infant relationship.

For more information please contact us on 020 8680 0404 or email:
